PROFESSIONAL SUMMARY

Data Analyst with 1 year of internship experience in Python, SQL, Excel, Power BI, and Tableau. Experienced in cleaning and analyzing large datasets, building interactive dashboards, and generating business insights. Strong foundation in SQL, data visualization, and automation with a passion for solving business problems using data. Proven ability to collaborate with cross-functional teams to enhance metrics tracking and improve decision-making.

PROFESSIONAL EXPERIENCE

Data Analyst Intern

Haris & Co Academy (HACA), Kozhikode

June 2025 – June 2026

- Collected, cleaned, and preprocessed datasets using Python and Excel, improving data quality and reliability.
- Built 20+ interactive Power BI, Excel, Tableau dashboards for business reporting. Reduced manual reporting time by 30% through automated Excel workflows.
- Collaborated with training & development teams to design data models and reports, enhancing decision-making processes.

EDUCATION

Bachelor of Science in Computer Science

Calicut University / MES Kalladi College, Mannarkkad, Palakkad

Graduation: May 2025

GPA: 6.7 / 10

Higher Secondary (Class XII), Computer Science Stream

DBHSS Thachampara, Mannarkkad, Palakkad

Score: 76%

Completed: 2022

TECHNICAL SKILLS

- **Programming Languages:** Python (including libraries for data analysis), MySQL
- **Data Visualization & BI Tools:** Tableau, Microsoft Power BI, Microsoft Excel (pivot tables, dashboards)
- **Data Analysis:** Data cleaning, preprocessing, statistical analysis, problem solving
- **Automation Tools:** Lovable, N8n, Zapier

RELEVANT PROJECTS

Electric Vehicle Market Analysis (MySQL) | [GitHub](#)

- Analyzed an **Electric Vehicle dataset** using **MySQL** to generate business insights with SQL queries, aggregations, window functions, and data analysis techniques.
- Designed a **normalized relational database** using **Primary Keys, Foreign Keys, and SQL JOINS** to improve data organization and relational analysis.

Movie Database Exploratory Data Analysis (Python) | [GitHub](#)

- Performed end-to-end **Exploratory Data Analysis (EDA)** on a movie dataset using **Python, Pandas, NumPy, Matplotlib, and Seaborn**, including data cleaning, feature engineering, and visualization.
- Analyzed **movie genres, languages, popularity, ratings, and release trends** to generate business insights through interactive charts and statistical analysis.

Supermarket Sales Dashboard (Excel) | [Github](#)

- Developed an interactive sales dashboard using **Microsoft Excel, Pivot Tables, Pivot Charts, Slicers, and KPI Cards** to monitor sales, profit, and customer trends.
- Analyzed **product performance, payment methods, customer segments, and city-wise sales** to generate actionable business insights.

Crypto Currency Analysis (Power BI) | [GitHub](#)

- Developed an **interactive Cryptocurrency Dashboard** in **Power BI** using KPI cards, slicers, and visualizations to analyze market trends and key performance metrics.
- Built dynamic reports by performing **data transformation, data modeling, and DAX calculations**, enabling interactive analysis and business insights.
